

COMPUTER UPDATE NOTICE

SUBJECT: IQ-900 ZEN WATCH UPDATE

FIRMWARE UPDATE RELEASE DETAILS

For IQ-900 ZEN Watch Dive Computers to version 1H

EXPLANATION

In response to input received from owners and users of the IQ-900 ZEN, TUSA has corrected or modified the following items to improve the IQ-900 ZEN's operation:

- Adjusted the calculation routine in the portion of the watch time operating code which could lose 2 seconds of elapsed time during a logged dive.

UPDATE PROCESS

Units affected are the IQ-900 ZEN model containing earlier versions of firmware. To check your computers firmware version, please consult the owner's manual.

In the event that you have experienced any of the above, or you want to be sure they don't occur, you can upgrade your IQ-900 ZEN's firmware (operating software program) to newly released revision 1H using the IQ-900 ZEN Firmware Update program.

The IQ-900-030 ZEN Series USB cable is required. There is no need to return the unit to TUSA.

The update program with download instructions is available at www.tusa.com under the [Support Section](#) Or directly at this [link](#) (.zip file, 17.8MB)

TUSA DataLog PC Software version 1.0.7 is now available. You can download it at www.tusa.com under the [Support Section](#).

Should you have any questions, please contact your Authorized TUSA Dealer, or TUSA Customer Service by calling 800-482-2282 (8AM -5PM, PST Monday - Friday) or send an email to scuba@tusa.com.
